Feature	Advantage	Benefit
Air suspension with 5.25" travel	Meets h-point with more suspension stroke vs. standard seats	Better ride
Contoured metal seat and back pans	Provides greater support vs. standard tube frame	More comfort and durability
Ergonomic contoured molded cushions	Provides durability with FAB process vs. cut 'n' sew covers	More durability and cleanability
Quick attach seat and back cushions	Provides easy replacement vs. cut 'n' sew	Ease of service
Light weight	Eight (8) pounds lighter weight	Weight savings-load capacity
Innovation optional features	Ability to add up grades to seat	Customization
